Additional Information

- No additional information

Describe initiatives, processes or practices that you have implemented during your chosen reporting period that have improved packaging sustainability

We made significant changes to the packaging for thermal media kits which will begin appearing on the ANZ market in 2022 with the ARL logo. Two of the Items reviewed for the SPG Criteria will be sold for the first time in 2022.

Describe any opportunities or constraints that affected performance within your chosen reporting period

We moved some production from China to the USA such we had to recertify some materials.

Please use the space below to provide examples or case studies of exemplary packaging sustainability conducted by your organisation. The information provided in the boxes may be used directly in your public facing Annual Report and Action Plan. Submitted case studies might be used by APCO in the future to support other Members in achieving packaging sustainability.

During 2021 our Packaging Design Team worked on a feasibility study to reduce the amount of bubble-wrap bags for the D4000/D4600 and 305 media. When both are launched in ANZ this year (2022), the mass of the bags will be reduced to 4.47g from 7.54g and there are 2 bags in each kit. These should be high sales items.
